

Grape Harvest Container and Bucket Range

After years of experience working for the winegrowing sector, we have developed a highly practical range of accessories for grape harvesting.

Thanks to our grape harvest bucket, which can be attached to the 3-point hitch of your tractor, it's quick and easy to work along each vine row and empty the grapes into your transport vehicle.

Our container is a watertight tank specially designed for grape harvesting. Moreover, it can be adapted for use with all your flatbed trailers.

Grape harvest bucket

Steel 800-litre grape harvest bucket — 3-point hitch with an 18 cm welded steel extension

Overall length around 1.8 m

Overall width around 1.1 m
