

Série RES Spreader Range

Our Roche RES2 spreader range is specially designed for all uses that need to deal with height constraints: fruit farming, market gardening ...

Our models are multipurpose: with 2 horizontal beaters they can handle straw manure as well as compost.

The hydraulic drive conveyor combined with beater(s) ensure that materials are spread with a regular feed system.

Our table system (optional) gives greater flexibility in terms of spreading options both in the open field or for localised work.

Configuration standard

2 horizontal beaters (mechanical drive) (540 revolutions per minute)

Hydraulic drive conveyor; flow-rate control device

Tube chain conveyor (two-chain)

Standard wheels

Standard Cardan shaft

Front grill guard

Mechanical and hydraulic brakes (dual hydraulic line + mandatory ABS connection on the tractor)

Lights, approved for road use - 25 km/h
