

520 Pallet Box Loading Wagon

The pallet box loading wagon is the ideal solution for boosting productivity. It divides picking and hauling into two completely separate stages: once you have finished filling up the box pallets along your rows, you group them into blocks of twelve or fifteen (depending on the box size), stack them three levels high and Bob's your uncle! A single driver can load, haul and unload the pallet boxes without any help.

Standard model

Space frame equipped with prongs
 Separate hydraulic drawbar and wheels
 Hydraulic door - Reinforced front drop side
 4 or 5-function electric-controlled power unit
 Mechanical and hydraulic brakes (**dual hydraulic line + mandatory ABS connection on the tractor**)
 Lights, approved for road use - 25 km/h
